SHAHRIAR TASNIM

FIELD DEPLOYMENT ENGINEER | ROBOTICS & AUTOMATION

shahriar.tasnim98@gmail.com | (+1) 409-454-9687 | linkedin.com/in/shahriar-tasnim0013
Beaumont, TX | Open to Relocation and 75%+ Domestic Travel

PROFESSIONAL SUMMARY

Robotics and electrical engineer with 2 years of customer-facing field experience supporting 250+ installations, commissioning activities, and service recoveries for networked embedded and automation systems. Graduate robotics experience integrating an RGB-D vision work cell, robotic manipulator, gripper, ROS 2, and Linux software. Skilled in technical drawings and CAD, hardware–software integration, data-driven troubleshooting, site coordination, continuous improvement, and technical handoff in fast-paced field environments.

EXPERIENCE

Research Assistant, Robotics & Intelligent Control Systems Lab Jan 2025 – Apr 2026
Lamar University *Beaumont, TX*

- Integrated and commissioned a laboratory robotic sorting system using an RGB-D camera, uFactory xArm5, gripper, ROS 2, MoveIt 2, Linux, and sensor/actuator interfaces; validated calibration, startup, operation, and recovery workflows.
- Planned and executed **300 validation trials**, collected performance data, maintained issue records, and set troubleshooting priorities across perception, coordinate transforms, motion planning, gripper operation, and device communication.
- Reduced average cycle time by **35%**, from 63 seconds to **41.2 seconds**, while achieving **98.2% pose success** and **96.7% grasp success** through motion planning tuning, fault isolation, and recovery-logic improvements.
- Produced setup, camera calibration, validation, failure-mode, and results documentation to support repeatable deployment, and technical handoff.

Electrical Engineer Oct 2021 – Apr 2023
STATA IT Limited *Dhaka, Bangladesh*

- Supported **250+ customer deployments** through installation guidance, commissioning, startup verification, hardware validation, configuration checks, and post-installation technical support for embedded and automation systems.
- Resolved **100+ field service cases** involving electrical, sensor, communication, network, and device faults using schematics, AutoCAD drawings, DMMs, oscilloscopes, clamp meters, and diagnostic tools.
- Coordinated day-to-day service priorities with customers, vendors, and technical teams, restoring time-sensitive systems within **24-hour service windows** and communicating risks, actions, and status clearly.
- Verified low-voltage power, grounding, sensors, actuators, I/O, and TCP/IP or DHCP connectivity before startup; isolated hardware, wiring, configuration, and communication root causes.
- Prepared BOM inputs, vendor requirements, deployment notes, service records, and technical reports to support material readiness, cost awareness, schedule execution, and support handoff.

TECHNICAL SKILLS & KNOWLEDGE

Deployment & Project Execution: Robotic work-cell integration, installation, commissioning, startup and acceptance testing, site readiness, schedule tracking, issue/risk logs, vendor coordination, stakeholder updates, technical handoff
Robotics & Controls: ROS 2, MoveIt 2, RGB-D vision, robot/sensor calibration, motion planning, sensors, actuators, Siemens TIA Portal, Ladder Logic fundamentals, HMI basics, FANUC fundamentals
Electrical, Mechanical & CAD: Low-voltage systems, 3-phase power, transformers, breakers, wiring diagrams, electrical schematics, AutoCAD interpretation, Onshape, equipment inspection, DMM, oscilloscope, clamp meter
Networking & Software: DNS, DHCP, TCP/IP, Ethernet, routing and switching fundamentals, HTTP, Linux, Python, C++, Git
Data & Continuous Improvement: Test planning, root-cause analysis, failure prioritization, KPI and trend analysis, cycle-time reduction, Excel, pandas, NumPy, Matplotlib

CERTIFICATIONS & TRAINING

NFPA 70E Electrical Safety Training (2024 Standard), 2026 | **Siemens PLC Basics / TIA Portal** | FANUC Robotics Fundamentals | Industrial Sensors | Node-RED with WAGO PLCs | CSCMP Supply Chain Foundations: Manufacturing & Service Operations

EDUCATION

Master of Engineering Science in Electrical Engineering **Graduated May 2026**
Lamar University, Beaumont, TX GPA: 3.75/4.00

Bachelor of Science in Electrical & Electronic Engineering **Graduated Oct 2021**
American International University–Bangladesh, Dhaka, Bangladesh GPA: 3.38/4.00

Authorized to work in the United States; no visa sponsorship required. Open to relocation and extensive travel with good driving record.
